Infond Umbrella Fund

Infond Dividendni, developed market equity subfund

Investment policy

The sub-fund systematically selects investments in companies that regularly pay dividends.

The investment objective of the sub-fund does not include promoting environmental or social characteristics or sustainable investments, nor does it consider the EU criteria for environmentally sustainable economic activities. The sub-fund avoids investments in activities deemed harmful to society, such as thermal coal, tobacco, and operations related to controversial weapons.

Suitable for

The subfund is suitable for investors who are willing to assume higher risk and invest over the long term.

The summary risk indicator

The risk indicator is based on the assumption that investor holds the fund for at least 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the fund as 4 out of 7, which is a medium risk class. The summary risk indicator is based on an estimate of the magnitude of fluctuations in the value of the asset unit. Depending on the fund's operations in the future, the summary risk indicator may change. The lowest category does not mean a risk-free investment. The Fund does not use any protection for future market performance, so you may lose all or part of your investment.

Infond Megatrendi, the equity subfund of the Infond Umbrella Fund, invests in shares of companies whose products and services are part of structural changes in society, the environment, technology and demography (megatrends).

The investment objective of the sub-fund does not include promoting environmental or social characteristics or sustainable investments, nor does it consider the EU criteria for environmentally sustainable economic activities. The sub-fund avoids investments in activities deemed harmful to society, such as thermal coal, tobacco, and operations related to controversial weapons.

Suitable for

The subfund is suitable for investors who are willing to assume higher risk and invest over the long term.

The summary risk indicator

The risk indicator is based on the assumption that investor holds the fund for at least 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the fund as 5 out of 7, which is a medium-high risk class. The summary risk indicator is based on an estimate of the magnitude of fluctuations in the value of the asset unit. Depending on the fund's operations in the future, the summary risk indicator may change. The lowest category does not mean a risk-free investment. The Fund does not use any protection for future market performance, so you may lose all or part of your investment.

Infond Umbrella Fund

Infond Naložbeni cilj 2040, target date subfund

Investment policy

A professionally managed, well-diversified investment portfolio in a single fund. Infond Naložbeni cilj 2040 allocates assets among equity, bond and money market instruments based on its investment strategy.

The investment objective of the subfund does not include promoting environmental or social characteristics or sustainable investments, nor does it consider the EU criteria for environmentally sustainable economic activities. The subfund avoids investments in activities deemed harmful to society, such as thermal coal, tobacco, and operations related to controversial weapons.

Suitable for

Above all for investors with financial goal targeted around year 2040. On basis of its investment policy the subfund will gradually turn from predominantly equity to predominantly bond subfund as approaching year 2040.

The summary risk indicator

The risk indicator is based on the assumption that investor holds the fund for at least 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the fund as 4 out of 7, which is a medium risk class. The summary risk indicator is based on an estimate of the magnitude of fluctuations in the value of the asset unit. Depending on the fund's operations in the future, the summary risk indicator may change. The lowest category does not mean a risk-free investment. The Fund does not use any protection for future market performance, so you may lose all or part of your investment.

Please refer to the Prospectus, including the management rules of the Infond Umbrella Fund, and the Key Investor Information Document of each subfund. All documents and information regarding the operations of the Infond Umbrella Fund subfunds are published on the website www.infond.si, under the presentation tabs of each individual subfund in Slovene language.

The subfunds included in the monthly report of the Infond Umbrella Fund are suitable for investors who plan to save in the fund for at least the recommended number of years, are willing to take on certain investment risks, and are aware of the possibility of loss of assets. The funds are intended for investors who have free financial resources and wish to diversify them into various forms of investments. Investors do not need specific knowledge and experience with mutual funds and financial markets to invest in the fund.

The subfunds of the Infond Umbrella Fund are actively managed. The performance is measured against the benchmark index, which is stated in the Key Investor Information Document of each subfund. The fund's investment portfolio is not constrained by the investment structure of the benchmark index, but part of the fund's investments often also constitute a part of the benchmark index.

Past performance does not predict future returns. The maximum entry fees can reach up to 3%, and the maximum exit fees up to 3%. The mentioned fees reduce the displayed return. Future performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future. What you will get will vary depending on how the market performs and how long you keep the investment.
